

Transforming Industry Through Immersive Technology

ImmersiX - ARVR Applications

ImmersiX is a next-generation platform combining Augmented Reality (AR), Virtual Reality (VR), and Mixed Reality (MR) to elevate industrial training, maintenance, and collaboration. Designed to align with Industry 4.0 goals, ImmersiX connects the digital and physical environments, enabling smarter workflows, enhanced safety, and more effective knowledge transfer.

From immersive training to remote support and 3D design visualization, ImmersiX empowers teams to operate with greater precision, speed, and confidence.

KEY FEATURES

- AR-Based Support
- VR Learning Environments
- Mixed Reality Integration
- Hardware & System Compatibility
- Remote Collaboration Tools

BENEFITS AT A GLANCE

- Immersive Training
- Faster Maintenance
- Enhanced Safety
- Lower Operational Costs
- Flexible & Scalable Deployment

APPLICATIONS ACROSS INDUSTRIES

- Manufacturing & Assembly Operations
- Automotive and Aerospace Sectors
- Oil, Gas, and Energy Utilities
- Pharmaceuticals & Life Sciences
- Civil Engineering and Construction
- Logistics & Warehouse Operations
- Field Services and Infrastructure

ABOUT US

Technoviz Automation Solutions Pvt. Ltd.

We are a technology firm providing software & Industrial Automation Solutions. We have a deep focus on creating SMART Operations by leveraging technologies like the Internet of Things (IoT) and Internet of Services (Cloud) along with complete connectivity solutions.

Our latest innovations in industrial automation and smart monitoring:

IIoT-Driven Quality Inspection | IIoT OEE Dashboard | VisionAI | AlarmPro | Utility360 | SmartEdge AI | SmartEMS | ImmersiX

Each of them are engineered to deliver intelligence, efficiency, and control across your operations.
